

LEADER IN EFFICIENT HEATING

FUTURA

The Automatic feeding system of the Futura Eco boiler was designed for continuous operation lasting up to 4 days. (Depending on hopper size.)

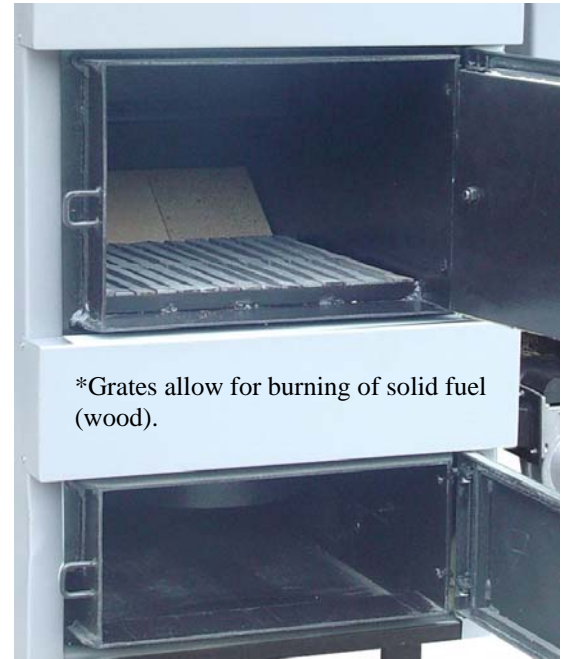

Coal Fuel Types:

- CHESTNUT
 - PEA
- BUCKWHEAT #1
- RICE COAL

The boilers are designed for continuous operation for heating homes and businesses where the main fuel is hard coal (anthracite).

Boiler output can reach up to 410K Btu which puts them well in the range of commercial application.

*Grates allow for burning of solid fuel (wood).

FEATURES:

- Steel build boiler (3/16, 1/4 inch), with a heat exchanger.
- Able to operate up to 45 psi of water pressure.
- High temperature cast iron retort style burner with an air system supporting efficient combustion.
- Digital system controls the screw conveyer on load based input assuring continuous operation lasting up to 4 days. (depending on hopper size).
